

SCIENCE OF NUMBERS

NUMEROLOGY IS A SCIENCE:

In fact, it's perhaps the oldest science known to man.

Another name for numerology is the "Science of Numbers." It recognizes that numbers are vibrations, and each vibration is different from the next due to the number of cycles it oscillates per second. And every sound, color, fragrance and thought is also a vibration, each dancing to the tune of its inherent number, which is connected to life in its own distinct way.

Numerology is the vibrational frequencies of numbers and how they affect human's on the physical plane. Each number 1-9 has a frequency or energy or meaning. What you must understand is that everything is connected and we all go through cycles. Every 9 years you go through a cycle 1-9 then it repeats itself every 9 years. Nine is a complete cycle that is why a baby is in the womb for 9 months. Numerology does not predict the future; it just tells you what the energy is like for you at that time. For example if you were trying to get pregnant you would have sex at the right 'time' when you are ovulating. Well numerology works in similar fashion, for example if this is an 8 year for you; we know that this is a great year for business or to start a business. If it's a 5 year you can expect change and broken engagements. If you knew it was going to rain outside would you bring an umbrella? Of course you would, this science just lets you know when there is a high chance of rain! This is not the only way to find out about oneself, some people have found who they are through the church, mosque, astrology, and meditation. There is no one correct way to determine who you are!

This is my personal list of numbers 1-9 with the word that matches its vibrational frequency.

1=Knowledge (MAN)

2=Wisdom (WOMB-MAN)

3=Understanding (CHILD)

4=Build

5=Freedom

6=Family

7=GOD

8=Power

9=Compassion

1. KNOWLEDGE: (MAN)

That is itself realizing that 'it is', before knowledge of self you truly do not exist. You and your thoughts are one in the same. This is the beginning the masculine principle.

However without the feminine principle the masculine principle could not exist. The 1 is the pioneer striking out alone. It is raw energy, positive, original and creative. It must take command and have the courage to maintain its direction without fear or opposition. 1 is the real I AM of humanity.

Keywords: Original, independent, aggressive, individualistic, creative, dominant, the first in a series, the start of any operation or activity, the leader, the pioneer, the boss who like authority.

2. WISDOM: (WOMB-MAN)

The Wise-Dome. This is you becoming aware of the details and the distinctions. The feminine principle, the duo, the pair; it is man and woman. The Ying and the Yang. It represents the agent, the go-between, the diplomat and peacemaker, because unity can only be accomplished through a meeting of the minds, a compromise on each side.

Music appeals to its sympathetic and emotional nature. Union is its goal, not separateness; therefore it is obedient to and understanding of others.

Keywords: adaptable, tactful, understanding, gentle, cautious, a follower rather than a leader.

3. UNDERSTANDING: (CHILD)

This is understanding ones-self through the birth of a child; the holy trinity. Three has the qualities of personality and self-expression. This understanding has the need to communicate and be involved in the pure joy of living. The proverbial child having fun: enjoying life. The ion, which sprang into existence from 0, ought to assert its individuality under 1 and felt the attraction of others under 2, now awakens to its need for social interaction. If any numbers could be called happy-go-lucky, it would be the effervescent 3.

Keywords: expansive, sociable, dramatic, communicative diversified, creative

4. BUILD:

It is time to build something for my family, after the fun of the 3 it is time to get down to work. 4 is the symbol of law, system and order, it is firmness, stability and conservatism. It is the builder who must submit to earthly things where form and substance are the predominant elements. Four is nature and relates to earth. Four therefore develops a practical nature, and through self-discipline, binds itself to a conventional routine exercise of its energy.

Keywords: form, work, order, practicality, construction, stability, endurance, discipline.

5. FREEDOM:

It is time for change and adventure after I have worked. Curiosity and constant activity produced a resourceful, adaptable and versatile entity always ready to take a chance.

Five is the midpoint in the cycle 1-9. Five is involved in much superficial interaction with groups and crowds; 5 attracts the opposite sex because of an irresistible magnetism, and this attraction sets the stage for the domestic responsibilities; which naturally follow under 6.

Keywords: versatility, resourcefulness, adaptability, change, activity, travel, adventure, promotion, speculation.

6. FAMILY:

Now it is time to focus and build our family structure; after the freedom of the 5 it is now time to get your house in order so to speak. The 6 desires close companion, marriage and a home and family where beauty and harmony prevail. A need for group harmony and service to the community follows naturally. The 6 settles down, blends into the community and can be gifted in the arts.

Keywords: family and social responsibility, service, love, compassion, counseling, healing, creativity.

7. GOD:

Seeking Answers: Now that you have your family in order, it is time to establish a philosophy in which to govern yourself and your family. Because solitude is necessary for self-analysis, you will be placed in these environments often of your own accord.

God rested on the 7th day and ALL things rest under the 7 because time is needed in which to meditate. Health is also highly sensitized under this vibration.

Keywords: quiet, introspective, intuitive, analytical, inspirational, reclusive, philosophical, mystical.

8. POWER:

Now after 'finding god' we must attain the power. If we had attained the power before we found God we would have been misguided with the power! Recognition in business and financial rewards are under this vibration. This is also a Karmic number so "ye shall reap what you sow". Eight has the ability and drive to overcome all obstacles with perseverance. Through fair and ethical standards, good judgment and organization abilities, it will achieve power.

Keywords: Power, responsibility, financial rewards, good judgment, recognition.

9. COMPASSION:

Now that you have made all the money it is time to give it away! Yes compassion the number of completion the last and highest vibrational frequency. To love thy neighbor, notice I did not say enemy! Love for all and universal service, you have traveled through the cycle of 9; which now bestows on you understanding and tolerance of others views. Nine is ready to give back to the universe in some way!

Keywords: Love, compassion, patience, universality, tolerance, selfless service, endings.

Now that we have that out of the way let me show you how this science can be used in real time. In order to find out how this information applies to you, just take your birthday and add it up until you end up with a single digit. Let's say you were born on 10/17/1988, you would then take the birthday and break it down to a single digit

number $(1+0)=1 + (1+7)=8 + (1+9+8+8)=26$ and $2+6=8$; which then breaks down to $1+8+8=17$ and $1+7=8$.

Power is equivalent to 8 and you can now look at the Keywords to find out some of your strengths!
